

# Safer Operation by Design

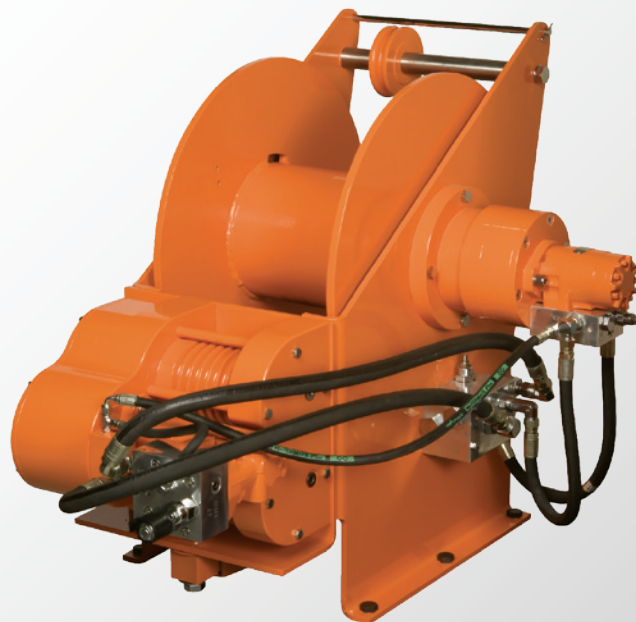

DP Winch® manufactures a complete line of planetary winches, capstans and bumper packages that get the work done on utility trucks, towing and recovery vehicles, trailers, and other equipment.

The DP Winch LINEMAN® series of products is specifically designed for the Utility Industry. There are reasons more and more Utility fleet managers specify Lineman traction winches, bumper winches, capstans and accessories over other brands, but we'll start with the first—*safer operation by design*.

Only LINEMAN® equipment is designed with safety features typically offered as options on competitive products. This means added protection against operator accidents, injuries, and equipment failure. At DP Winch, we know that overloading and downtime impact your bottom line. That's why every LINEMAN® winch is engineered from the very start to help you and your crew work safer—and smarter.

At DP Winch, safety isn't an afterthought—*it's a mindset*.

Infrastructure | Energy | Recovery

# DP Winch®—The Utility Industries Choice

Our Lineman® portfolio of traction winches, bumper winches and capstans is specifically designed for optimum performance for the Utility Industry

## Constant-Pull Traction Winches

Outstanding performance, more consistent operation, increased rope life

- Ideal for pulling long runs of underground conductors, delicate fiber-optic cables and hard-to-access overhead lines
- Pulling capacities from 7,000 lbs. to 25,000 lbs.
- Constant rope speed and pull

## Bumper Winches

Advanced design to help Utility fleets work safer and smarter

- All-welded construction for longer equipment life
- Pulling capacities from 8,000 lbs. to 30,000 lbs.

## Capstans

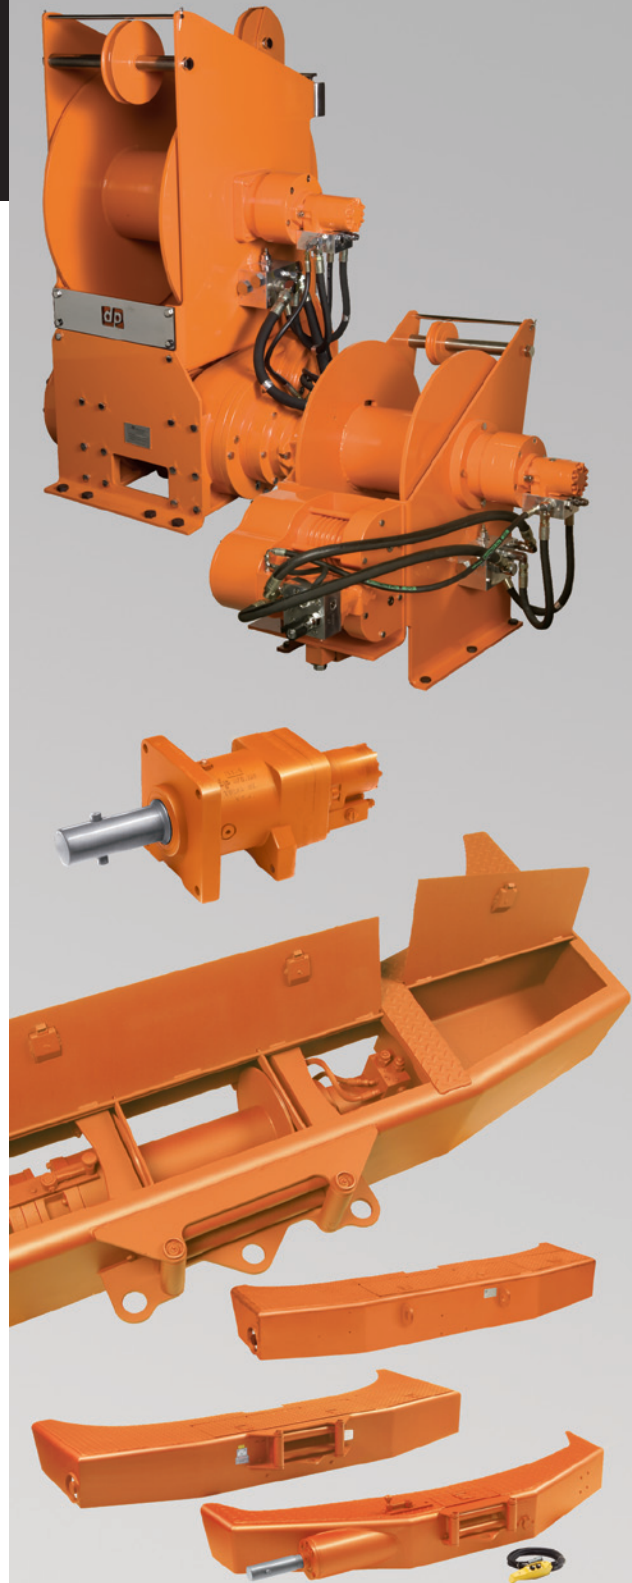

Advanced engineering for reliable operation and extra long life

- Output torques from 4,600 in.-lbs. to 24,000 in.-lbs.
- Faster line speeds under load
