

Greer Company

Crane Monitoring Accessories

The Most Accurate, Reliable
Monitoring Technology
for Mobile Hydraulic Cranes

Consider Yourself Warned.™

Get Your Cranes in Greer

U.S. crane manufacturers put their trust in Greer Company for the industry's most reliable crane monitoring systems. It's a decision they take seriously—and so do we.

For more than 35 years Greer Company has staked its reputation on product quality and accuracy. We aren't swayed by the latest innovations that are "almost there"

and we don't subscribe to new advances that cut corners just for the sake of change.

Instead, we pioneer the technologies that have made our customers true fans—who depend on Greer Company warning systems every day to maximize productivity and avoid overloads. We look forward to earning your confidence, too.

A Complete Line of Monitoring Accessories for Mobile Hydraulic Cranes

Boom Angle Indicators

Model 590/591

- Ideal for all mobile crane applications
- Plug-and-play "piggyback" display for use with MicroGuard® 586 RCI (Model 591 only)
- Backlit digital and analog display
- High and low angle limits
- Operator-settable audible and visual alarms

Complies with Cal/OSHA requirements.

Bar Graph Displays

- Continuous display of percent of rated capacity using green, amber and red lights
- Can be mounted close to line of sight for easy viewing
- Readable in all lighting conditions
- Dimmer/brightness button

Hoist Rope Tensiometers

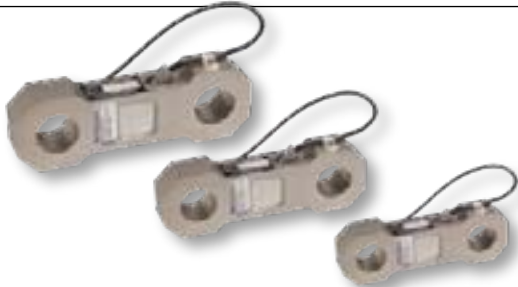

- Solid mount or swing arm installations
- Horizontal or vertical mount
- Simple to install and operate
- Rope sizes from 1/2" to 1-1/4"

Hoist Drum Rotation Indicators

- Indicators monitor hoist drum rotation and enable operator to literally feel direct drum response to control lever operation
- Deliver accurate and confident indication even at very slow speeds
- Bidirectional; extremely precise
- Quick, easy installation

Shear Beam and Tension Link Load Cells, Load Cell Links and Adapter Plates

- 5K beam load cells for low-profile applications
- In-line link load cells available from 20K to 100K ratings
- High quality stainless steel alloy, electroless nickel/ chrome plated construction
- Compact and easy to mount

5K beam not shown.

Hardwired Anti-Two Block Systems

Model BB-508 and 509

- Multifunction two block warning systems for mobile hydraulic cranes
- Audible and visual alarms
- Models include a 10-amp relay to operate an optional motion-cut solenoid

Anti-Two Block Switches

- A wide range of configurations for main hoist, auxiliary hoist and jib applications.
- Simple, rugged design
- Reliable and maintenance free

Function Kickout Valves (Motion Cut Solenoids)

- Valves provide function kickout when installed with Greer Company's anti-two block or load indicator systems
- One-piece construction and leak resistant
- Available in 40 and 70 GPM models
